

# Recommendation from the Santa Cruz County Health Officer

## Guidance for Childcare Facilities

- Carry out activities in stable groups of 12 or fewer children
- Children should not change from one group to another
- Separate groups into different rooms if more than one group of children are at one facility
- Groups should not mix with each other
- Providers or educators should remain solely with one group of children

### Childcare facilities are defined as:

- Childcare establishments
- Summer Camps
- Other educational or recreational institutions
- Programs providing care or supervision for children of all ages

The Health Officer will carefully monitor the changing public health situation as well as any changes to the State Shelter Order. In the event that the State relaxes restrictions on childcare and related institutions and programs, the Health Officer will consider whether to similarly relax the restrictions imposed by this Order.
