

# How well do COVID-19 vaccines work?

- All available vaccines are safe\* and effective at keeping us from getting COVID-19.
- Available vaccines are:
  - Pfizer
  - Moderna
  - Janssen (Johnson & Johnson)
- Take the vaccine you are offered.

\*If you have any concerns or questions, then please contact your healthcare provider.

# Are the vaccines safe? What do we know?

## YES!

- **All vaccines are safe!**
- All vaccines will keep you safe from getting very ill from COVID-19.
- The best vaccine for you is the first one you can get.

# Why should I get the vaccine if it might make me feel bad?

- The benefit of being protected from from Covid-19 far outweighs the small discomfort you may have after the vaccine.
- You may experience minor side effects like a sore arm. These are good signs your body is building protection!
- For most, the minor side effects resolve within 48 hours.

# What happens after I get the vaccine?

- The vaccine protects you, but you still need to protect others.
- We are still learning about:
  - how effective the vaccine is against variants.
  - how well vaccines keep people from spreading the disease.
  - how long vaccines can protect people.
- Until we know more: wear a mask, wash your hands, and keep 6 feet distance.

**WEAR A MASK.**

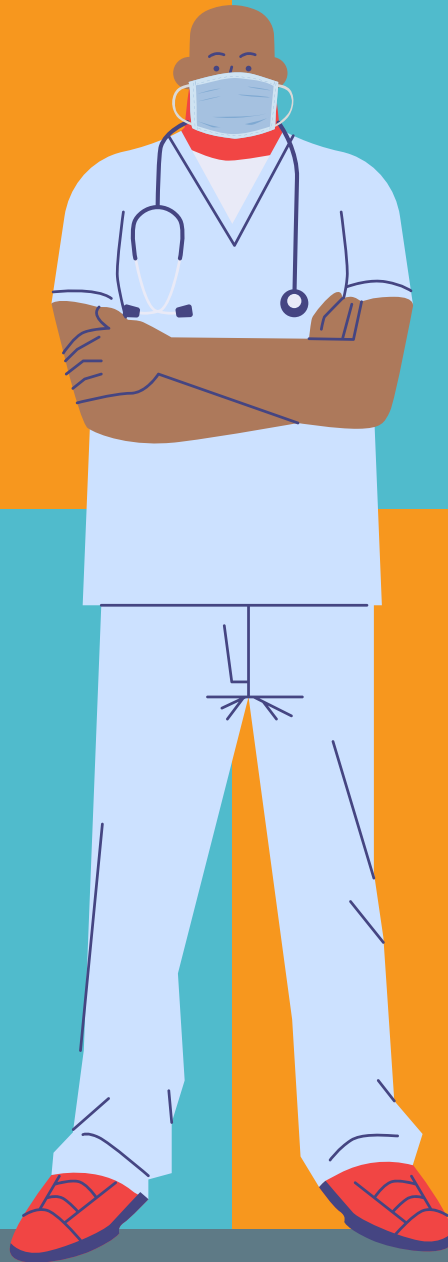

**WASH YOUR HANDS.**

**KEEP YOUR  
DISTANCE.**

**MEET OUTDOORS OR IN  
WELL VENTILATED  
AREAS**

**Remember:**

- The vaccine keeps you from getting very sick from COVID-19. We don't know yet if it keeps you from carrying or transmitting the virus to others.
- Until we know more, everyone should continue to follow the safety guidelines.
